NAPOLI

Il Vesuvio visto dall'aereo

Le Vésuve vu de l'avion

The Vesuvius seen from the airplane

Der Vesuv aus Flugzeug Gesehen

Dear Helen & Elmer

I climbed up to the top of Mount Vesuvius to have a look inside. There's still a little smoke issuing from a few crevices but our guide said the volcano was "dormant" for the time - being (no rumbles yesterday)

The view of Naples Bay from the mountain top is fantastic too.

We'll be back in Naples the end of this week. Love, Vicki
